Greenlight Simulation Launches New Specialty Rain and Night Drives

State of the art simulator-based driver training for teens

Danville, CA — 10/16/23 — Just in time for winter, Greenlight Simulation is incredibly excited to announce the launch of their new Rain & Night training package.

Greenlight’s simulator-based driver training center in Danville is already changing the way teens learn how to drive by teaching them the foundational skills of driving in the safety of a virtual world. With these new training options, they are taking it a step further by allowing teens to experience how different road conditions can impact driving.

“With daylight waning and another wet winter predicted, we really wanted to give our students the opportunity to practice these challenging driving scenarios in the safety of our simulators. Our teaching philosophy is built around repetition in training exercises. It’s not enough to experience hydroplaning once and hope it doesn’t happen again, they need repetition to truly learn to handle these types of conditions,” said CEO Jason Zimmerman.

Studies have shown that rain is the number one cause of weather-related accidents. Greenlight’s new Rain Drive offers teens the chance to safely experience slick roads, standing water, heavy rainfall, and reduced visibility, all while receiving guidance on how to adjust their speed, braking, and steering accordingly.

Driving at night poses new risks we don't encounter during the day. With Greenlight's new Night Drive, teens are coached on how to anticipate and adjust to challenges that night driving presents like decreased depth perception, lower color recognition, and poorly lit road hazards.

Research has proven that simulators are an effective driver training tool, and simulation is trusted in other high-risk industries like aviation, law enforcement, and medicine. Greenlight's unique combination of curriculum, coaching, and technology represent a first of its kind training program to be offered to the general public. The new Rain & Night Training Package is available to Greenlight customers who have completed their Core 6 Training Package which covers the foundational driving skills teens need before they begin their behind-the-wheel training. Learn more and book your packages today at greenlightsimulation.com.

About Greenlight Simulation:

Like all good startups Greenlight Simulation was founded in a garage in by a team of engineers, racers, and driving experts to help people become the safest, most confident, and skillful driver they can be. Their simulator-based driver training courses allow new drivers to practice the dangerous, the difficult, and the scary in the safety of a virtual world. Training sessions are available at Greenlight's simulator training center in Danville. For more information visit greenlightsimulation.com.
