Greenlight Simulation Unveils Its Powerful New REACT Driver Training Course

Empowering Drivers to Navigate Emergencies with Confidence

Danville, CA — 5/17/24 — Greenlight Simulation sets a new standard in driver training with the launch of its REACT (Road Emergency, Awareness, and Control Training) simulator-based driver training course. Harnessing the power of its cutting-edge simulation technology, Greenlight provides a dynamic training environment for drivers of all levels to develop their vehicle control skills and boost their ability to tackle challenging driving scenarios, all in the safety of the virtual world.

“Our REACT course is a game-changer. It’s the ultimate training ground where drivers can safely master emergency maneuvers and car control skills that can save their lives out on the road. Traditional driver training falls far short in teaching critical skills for dealing with high-risk situations like emergency steering, skid recovery, mid-corner corrections, and panic braking. Until now, specialized training like this was hard to find, costly, and inconvenient, but Greenlight makes this invaluable training more affordable and easily accessible through our simulator-based courses at our training center in Danville. Plus, it is far less intimidating – in our simulator, mistakes are valuable lessons instead of crashes, empowering drivers to learn without anxiety.” - Josh Hurley, Chief Driving Officer -

Proven effective in research and other high-risk activities like aviation, law

enforcement and medicine, simulator training enables measurable, repeatable, specific practice that, before Greenlight Simulation, simply wasn't available to the public at-large. Through its unique combination of expertly crafted curriculum, real-time coaching, and advanced simulation technology Greenlight offers a range of training programs for every driver. From complete beginners to the deeply experienced, Greenlight is building better, safer drivers everyday.

The REACT course is open to graduates of Greenlight's Advanced Beginner, or Core 6 Training Packages, or non-Greenlight learners who have completed six hours of behind-the-wheel training, or licensed drivers of all levels. Learn more and purchase a training package today at greenlightsimulation.com.

About Greenlight Simulation:

Like all good startups Greenlight Simulation was founded in a garage by a team of engineers, racers, and driving experts to help people become the safest, most confident, and skillful driver they can be. Their simulator-based driver training packages allow drivers of all levels to practice the dangerous, the difficult, and the scary in the safety of a virtual world. Training sessions are available at Greenlight's simulator training center in Danville. For more information visit greenlightsimulation.com.
